Re: RoHS, REACH, PROP65 and conflict materials compliance

We certify that all items purchased from Aspen Fasteners which are specified to be RoHS compliant on your purchase order are REACH, 3TG, Cal Prop 65, RoHS, RoHS II (2) and RoHS III (3) compliant meaning that they do not contain lead, cadmium, PBB, PBDE, DEHP, BBP, DBP, DIBP or hexavalent chromium.

Additionally, they have not come into contact with mercury or mercury compounds during manufacturing or subsequent processing. All products that were previously RoHS compliant would also be compliant under Directive 2011/65/EU RoHS II (2) and Directive 2015/863/EU RoHS III (3).

With regards to REACH and SVHC, substances of very high concern, we rely on upstream manufacturers of chemicals to register with ECHA. Our fasteners are considered "articles" and do not contain nor have knowingly come into contact with any of the REACH substances of very high concern. The current number of substances on the candidate list is 251. This list was last updated on November 5, 2025.

Regarding California Proposition 65, our RoHS compliant steel products do not contain and are not likely to expose individuals to any of these listed chemicals. Effective August 31, 2018, any new receipt of products that may be identified as harmful under the California Prop 65, will be labeled appropriately.

Our parts are conflict free. They are not manufactured with any "conflict materials", tantalum, tin, tungsten or gold (commonly referred to as 3TG), from the Democratic Republic of the Congo (DRC) and adjoining countries (the "Covered Countries").

Thank you,  
Danny Chander,  
Quality Manager
